Glance, MD <i>Assistant Professor of Psychiatry</i> <i>University of Pittsburgh School of Medicine</i></p>
DISCUSSANTS	Speakers
DESCRIPTION	Clinician educators in the Department of Psychiatry are at the forefront of innovations in teaching and programmatic development. Skill development in education is fostered through programs such as the AACE track, CEFDP, and the WPIC Leadership Academy, to promote skills such as bedside teaching, curriculum development, and utilizing adult learning principles. In this session, we will use examples from across the department on how to turn educational concepts into products that may be disseminated to a wider audience.
